MUMBAI, India – August 2, 2017 – eScan, Total Security has achieved Virus Bulletin's VB100's comparative review test certificate for its eScan Internet Security Suite. The test, in June 2017, was conducted on Windows 7 and 10 Professional. eScan Internet Security Suite proved its capability of providing advanced protection against malware listed by WildList Organization with the RAP score of 100%.

Virus Bulletin is a world-renowned independent testing and certification body, in testing, reviewing and benchmarking security solutions for over 20 years. The VB100 certificate is given to the products that meet the quality standards of endpoint security products that are recognized as legitimate and strong anti-malware solution. During the recent test, eScan Internet Security Suite successfully blocked 100% of the malware samples that are listed as 'In the Wild' by the WildList Organization and generated no false positives while scanning. eScan scored best in the RAP tests, in addition to raising Zero False positives, while product's stability was rated 'solid' by the testing body.
eScan Internet Security Suite with Cloud Security for Home and Small Office Edition is a specially designed security product that provides real-time protection for computers and laptops from growing cyber threats, such as Viruses, Spyware, Adware, Key loggers, Rootkits, Botnets, Hackers, Spam and Phishing. eScan ISS protects a user's personal information and ensures safe computing environment to the whole family when browsing the internet, shopping online, performing online transactions or social networking.
