eScan has announced its participation in CeBIT 2010 taking place in Hannover, Germany from March 2nd to March 6th 2010.

eScan will be exhibiting its latest advancements in the eScan range of products in CeBIT 2010. Built on the revolutionary technologies such as: MicroWorld Winsock Layer (MWL), Non-Intrusive Learning Patterns (NILP), Real-Time Blackhole List (RBL), Spam URL Real-Time Block List (SURBL), eScan provides total protection to your Computer System even against zero day threats.

Mr. Govind Rammurthy, CEO & Managing Director of eScan, said "eScan range of security solutions offer complete packages for all segments of users including enterprise and SMB/SOHO segments. Coupled with innovative features like ERS (eScan Remote Support) and eScan Auto Backup/Auto Restore features, eScan is equipped to provide speedy support and proactive protection to customers based anywhere in the world. At CeBIT 2010, we will be presenting the latest version of eScan with the new Windows Based Rescue Disk feature. This helps in creating a Rescue Disk to clean boot Windows PC, enabling users to scan and clean infected Windows systems from rootkits and file infectors that cannot be cleaned in the normal Windows mode."

Mr. Sunil Kripalani, Vice President - Global Sales & Marketing, eScan, sharing his views said, "CeBIT is an ideal platform for eScan to showcase and present their services & technological expertise to the European market. CeBIT is the world's largest trade fair showcasing Digital IT and Communications solutions for small and big companies. CeBIT provides an opportunity for organizations to come together and display their strategies and products. eScan will be participating in the CeBIT 2010 trade fair, Booth C26 - Hall no. 11, being held in Hannover, Germany, from March 2 - March 6, 2010".
