**eScan Enables Website Based Activation**By [ChannelTimes Staff](#)

Mumbai, Mar 17, 2010 1512 hrs IST

eScan, an information security solutions provider, announced the launch of website based activation along with the option of activating it offline through phone, fax or email.

Currently, web-based activation is available only for the home user editions which include eScan Antivirus and eScan Internet Security Suite 1/ 3-users licenses.

Commenting on this, Anil Gupta, Head of National Sales, eScan said, "Though we were offering offline mode of activation to our customers and partners, they had to fax/email our support team to get the activation code. In order to make the activation process simpler with a self servicing model, we introduced this feature on our website. This is available for activation of both New eScan Licenses and eScan Renewal Licenses."

This facility will provide an alternative to both end consumers and partners to quickly activate their copy of eScan. This will help channel partners worldwide to provide faster activation support to customers who have poor internet connectivity. In addition, the customer will also get an email with the activation code, license key and the license period for future reference and use.

Partners can get the machine code of the customer s machine and activate it online for them. The steps on how to get the machine code is available [http://www.escanav.com/english/content/products/generic\\_eScan/knowhowto\\_get\\_machinecode.asp](http://www.escanav.com/english/content/products/generic_eScan/knowhowto_get_machinecode.asp).

The "eScan Activation" link is available in the dropdown menu of both "Customer Resource" and "Partners" sections on the company. The link to activate go to <http://www.escanav.com/websiteactivation>.
