eScan Acquires ICSA Labs Certification

Posted Wednesday, January 06, 2010 By ITVN Network

ADVERTISEMENT

eScan has recently achieved yet another milestone by acquiring the ICSA Labs certification. In addition to this, eScan also received the much coveted Gold award in Malware Removal and Bronze award in AV Comparatives On-Demand PUA detection.

The ICSA Labs' Anti-Virus Certification Program provides the user community with the assurance that all ICSA Labs Certified anti-virus products comply with industry-accepted criteria. To achieve the ICSA Labs Anti-Virus Certification, products must meet critical criteria for detection of malware in desktops. Products are required to detect 100 percent of the viruses in several test sets, including current In The Wild List. eScan passed the test by showing an excellent performance on testing done on Windows 7 platform.

Speaking on this, Govind Rammurthy, Managing Director and CEO of eScan said, Certifications like ICSA reiterates that eScan provides the highest level of Information Security to its customers. Such awards motivate us to continuously innovate and provide breakthrough technology solutions to our customers that will secure them from all Information security threats. In order to keep pace with changing threat scenarios, an anti-virus solution has to be consistently upgrading itself. The Gold and Bronze awards from AV-Comparatives highlight the consistent performance of eScan in successfully thwarting the Information Security threats posed by the modern high tech cyber criminals to both home users and businesses.
