Introducing the "Next Generation" Information Security with eScan 11

eScan, one of the leading Security solution providers and the world's first Real-time Anti-Virus and Content Security Solution developer, announces the launch of eScan 11; the Next Generation Information Security Solution.

eScan 11 is a comprehensive Anti-Virus, Anti-Spam, and Content Security Solution that provides Zero-Day protection to computers from objectionable content and security threats, such as Viruses, Spyware, Adware, Keyloggers, Rootkits, Botnets, Hackers, Spam, and Phishing Web sites. While it raises the quality bar on securing information assets, it is also powered by technologies that keep the computer's memory and resource usage to the least.

eScan 11 comes with a sleek, trendy, and easy to use Graphical User Interface that has been designed to meet the requirements of both novice and expert users. Beneath the trendy and classy interface that is the first of its kind amongst security software, eScan 11 is power-driven by multiple detection engines that ensure complete security to computer users even from the next generation threats.

Some of the new additional security features in eScan 11 include, Installation CD with Rescue disk, a powerful Web-Phishing filter, advanced File Blocking and Folder Protection, Faster Scanning with Whitelisting Technology, Virtual Keyboard to protect against keyloggers, User-based Parental Control, Automatic Patching of Critical Microsoft® Operating System updates, and enhanced Self Protection in addition to major enhancements to its existing features.

eScan 11 also comes with a Gaming Mode that ensures uninterrupted Gaming experience and a Laptop Mode feature that provides unmitigated battery time on laptops.

"The current times have increased the expectations and demands from security software due to the highly evolving threat scenario", stated Mr. Govind Rammurthy, CEO and Managing Director, eScan. "In eScan 11, we have factored the attack vectors and methods of future breeds of Malware as well as have power packed it with technologies that can counter them. Though eScan 11 provides multi-layered protection, it utilizes very low memory and system resources, thus not compromising on the important element of speed. We are proud to present eScan 11 that is today's solution for even tomorrow's malware. The Home User editions are available for purchase from our Web Site and through our partners worldwide; the SMB and Corporate versions will be available shortly. Our customers who use eScan 10 can upgrade to the new eScan 11 free of cost."
