Content Security Solution providers has bagged the latest AV-TEST certification for their Home user product, eScan Internet Security Suite with Cloud Security.

The product proved 100pc effective against harmful malware attacks, inclusive of web and e-mail threats during the test that was conducted in May and June 2014.

The AV-TEST award acknowledges supportive and effective antivirus products which offer performance that adds to setting up existing standards in the field of IT security and technology. AV-TEST has set up high-quality and efficient technical research environments wherein the researchers install various antivirus products on identical PCs. Mainly focusing on real-world threats, over 4,000 tests were run on 20+ home user security products using their default settings during May and June. eScan Internet Security Suite with Cloud Security effectively secured the PC by dodging all challenges thrown towards it.

Govind Rammurthy, MD and CEO at eScan said: "We are encouraged with this award which evinces that our Internet Security Suite ensures 100% detection of the latest threats. It proves our commitment towards providing maximum protection to IT users against evolving cyber threats."
