## **eScan Appoints Mylo Inc as an Exclusive Business Partner for Belgium**

June 30, 2012

*PRLog (Press Release) – Jun 30, 2012 –*

**eScan expands its partner network in Belgium.**

Belgium, July 22, 2012: eScan, one of the leading Anti-Virus and Content Security Solution providers announces the expansion of its channel partner network for SMB and Corporate segments in Belgium through their newly appointed partner Mylo Inc., providers of ICT expertise, solutions and services.

On this occasion, Mr. Govind Rammurthy CEO and Managing Director, eScan, said, “According to Internet World Stats, April 2012, there were 8,489,901 internet users in Belgium (representing 81.4% of the population) in December 2011, and this number is increasing day-by-day. Looking at the current scenario of IT cyber threats faced by large networks, security is the biggest challenge for them. These ever-evolving security threats that

are caused by insiders as well as intruders severely affect business operations, its profitability as well as rapport with customers. eScan range of advanced security solutions are fit to fulfill the security needs of networks in such scenario. Our association with Mylo Inc. is a step ahead, in accordance to our expansion plans in Belgium to make eScan, the most preferred Anti-Virus amongst the IT users in the region.”

eScan range of security solutions for large networks are well equipped with eScan Management Console (EMC) which comprises of a secured web Interface that facilitates dynamic security management of the server and endpoints in the network, ensuring the network stay secured. eScan security solutions are designed not only to meet current, but also the future business needs, in order to ensure business growth and continuity.

Talking about this exclusive partnership for Belgium, Ms. Shweta Thakare, AVP – Europe, APAC & SAARC, eScan said, “The latest version of eScan is designed to meet the needs of small and medium-sized businesses as well as corporate. eScan is not only an easy-to-use and cost-effective network security management solution, but is also designed specifically to resolves issues typically encountered by large networks due to increasing cyber attacks. It adapts to changing network conditions and ensures that businesses do not face any disruption. Mylo Inc. has a wide customer base in various segments across the region; hence, with this association we look forward to attain a sizable market share in SMB & Corporate sector in Belgium.”

Sharing his thoughts on this partnership with eScan, Mathias

Buckinx, Managing Director, Mylo Inc. bvba, said, “Our partnership with eScan enabled us to bring a whole new level of service into our spectrum. Our missing link, it was one thing to be associated with business security services, but it is so much better to be able to deliver a product that does much much more than its competitors and at such an interesting conditions. For us, this partnership is what makes Mylo complete.”

#### About eScan:

eScan, one of the leading Anti-Virus & Content Security solutions for Desktops & Servers is developed and marketed by MicroWorld. It is powered by innovative and futuristic technologies, such as MWL Technology, DIRC Technology, NILP Technology, and sophisticated Anti-Virus Heuristic Algorithms that not only provides protection from current threats, but also provides proactive protection against evolving threats. eScan provides 24×7 free remote support facility, integrated in the software to help customers to get their malware related issues resolved in the fastest possible time-frame. It has achieved several certifications and awards from some of the most prestigious testing bodies, notable among them being Virus Bulletin, AV-Comparatives, West Coast Labs (Checkmark), ICSA, and PCSL labs. Combining the power of various technologies, eScan provides Multi-level Real-time Protection to Computers and Networks.
