## eScan achieves ICSA Labs Anti-Virus Desktop certification

Submitted by editor on April 6, 2010 - 13:21

eScan, one of the leading Information Security solutions that provide proactive protection against viruses, spam, trojan, and many other information security threats, announced that eScan has achieved ICSA Labs Anti-Virus Certification for Malware Cleaning on Microsoft Windows 7 operating system.

ICSA Labs Anti-Virus Certification Testing Laboratory offers vendor-neutral testing and certification of security products. Enterprises worldwide rely on ICSA Labs to set and apply objective testing and certification criteria for measuring product compliance and performance. With a focus on providing its customers a secure work environment, eScan is a one of the leading innovator in the development of new and enhanced technology to keep threats at bay. The certification adds a new dimension to its products' efficiency and global acclaim. ICSA Labs certification is a high-quality benchmark that verifies the trustworthiness of security products.

The ICSA Labs' Anti-Virus Certification Program provides the user community with the assurance that all ICSA Labs Certified anti-virus products comply with industry-accepted criteria. To achieve the ICSA Labs Anti-Virus Certification, products must meet all criteria for Anti Virus cleaning. Products are required to detect and clean 100 percent of the viruses in several test set.

"We are excited to have eScan achieving another certification from ICSA Labs. ICSA had already certified eScan for Malware detection, now this certification in Malware cleaning is a re-assurance about our dedication to provide our customers with reliable and highly effective solutions." said Govind Rammurthy, CEO & Managing Director, eScan.

"Coming close on the 2009 Gold Award by AV-Comparatives for Malware Cleaning, this will boost both our partners and customers with the confidence that they have chosen the right solution for their Information Security needs." added Mrs.Rohini Sonawane, COO of eScan.

Since its launch last year, eScan 10 has proven to be a technologically advanced solution, providing a simplified GUI which makes it easy to operate even for a novice user. For more tech savvy users, eScan offers advanced configuration controls providing multi-level enterprise-grade configurable protection to those who want it. eScan 10 also features real time network activity monitor; making use of a TCP viewer utility, solidly implemented high quality main anti-Malware, anti-hacking components and many additional tools.
