eScan introduces Version 11 Products for Corporate and SMBs in the Indian Market

eScan has launched Version 11 of eScan Corporate Edition & Small and Medium Business (SMB) Editions. Following the successful launch of the Small Office and Home Office editions of eScan version 11, the Corporate and SMB Editions of eScan version 11 are all set to change the dynamics in Information Security for networks in both Enterprises and SMBs. Power

packed with technologies that can provide proactive protection to networks even from the next-generation threats, the feature-rich eScan 11 for Corporate and SMBs has been developed to be very light on system resources and does not slowdown the client systems.

"The current times have increased the expectations and demands from network security software due to the highly evolving threat scenario. Cybercriminals have now started targeting sensitive business data such as confidential research reports, new product plans and strategies through targeted spear Phishing and other means. Today, Information Security at both servers and endpoints is vital to ensure business continuity as data leakages will be very detrimental to the bottom lines of businesses," said, Govind Rammurthy, MD & CEO, eScan.

The new secure web Interface facilitates dynamic security management of the network endpoints by the administrators. Some of the new features available in eScan version 11 of the Corporate and SMB Editions include preventing Network Outbreaks, Data theft, Identity

theft and Security violation notifications. Some of the additional benefits of deploying eScan 11 in Corporate and SMBs include reduced IT costs with better Integrated Security Management through automatic patching of critical Windows OS vulnerabilities, File Reputation Services, ADS integration and Support for VMware, SYSLOG, SNMP and NAC/NAP. The new eScan 11 also boasts of the lowest false positive detection rates which will save time and resources of network administrators.
