

## eScan v11 products for Corporate and SMBs now available in India

eScan, a security solution provider, officially announced the launch version 11 of eScan corporate edition and small and medium business (SMB) editions. The company informed that the solution is capable of preventing network outbreaks, data theft, identity theft and security violation notifications.

"In the Version 11 of the eScan Corporate and SMB Editions, we have factored both the threat vectors and infection methods of current as well as future breeds of Malware and have power packed it with technologies that can effectively counter them," remarked Govind Rammurthy, MD & CEO, eScan.

The new secure web Interface facilitates dynamic security management of the network endpoints by the administrators. According to eScan, deploying of this solution reduces IT costs with better Integrated Security Management through automatic patching of critical Windows OS vulnerabilities, File Reputation Services, ADS integration and Support for VMware, SYSLOG, SNMP and NAC/NAP. IN addition, it also boasts of the lowest false positive detection rates which will save time and resources of network administrators.

Some of the technologies eScan incorporates are MWL Technology, DIRC Technology, NILP Technology and sophisticated anti-virus heuristics algorithms that provides Zero Day Protection to both servers and endpoints.
