

SMBs should look at
having basic
perimeter security
with firewall
protection

B U Y E R S G U I D E

SMBs need basic perimeter security

MicroWorld MailScan for Mail Servers

Features: It stops spam, Phishing and virus attacks using a combination of technologies such as Non Intrusive Learning Patterns (NILP), Gray Listing, Real-time Black List (RBL), SURBL, General Header Tests, MX/A DNS Record Verification, Reverse DNS and X-Spam Rules Check. When a virus is detected in an e-mail or attachment, or when restricted words and phrases are found in the mail content, the mail can be deleted, quarantined or disinfected.

Price: Rs 1,082 for 5-10 users, Rs 657 for 11-24 users, Rs 587 for 25-49 users, Rs 532 for 50-99 users, and Rs 462 for 100-249 users. (License fee is for one year)
