Wednesday, November 18, 2009

Mumbai: eScan is now a Microsoft Gold Certified Partner and has earned the gold certificate in Microsoft's partner program in recognition of its strategic role and impact on the security industry. Having won this certification based on customer endorsements and loyalty to Microsoft suite of products. Other key contributors to this certification were certification of eScan in Vista, Windows 7 and having many Microsoft certified professionals as part of their team.

Microsoft gold certified partners are the elite Microsoft business partners who earn the highest customer endorsement. They have the knowledge, skills, and commitment to help

implement technology solutions that match exact business needs. Gold Certified Partners represent the highest level of competence and expertise with Microsoft technologies, and have the closest working relationship with Microsoft.

"Getting the highest level of certification from the world's largest software vendor reiterates our determination and capabilities in providing cutting edge security solutions to our customers. This partnership will help us in delivering faster solutions for upcoming Microsoft technologies too." explained Govind Rammurthy, CEO & MD, eScan.

Rohini Sonawane, COO, eScan added, "These certifications drive us to develop innovative technologies that can help our customers secure their desktops and networks in this ever expanding threat scenario. Being a part of the select Gold circle makes us proud of our accomplishment and we are looking forward to accomplishing many more certifications."
