Microsoft accredits eScan for Windows 7 compatibility

eScan has announced its accreditation for Windows 7 compatibility by Microsoft. With this, all new customers and existing customers of eScan will not have any compatibility issues when upgrading to Windows 7.

Windows 7 compatibility is available from the recently released version of eScan 10 - Version 10.0.997.491 and above. In this release, eScan also contains two new features – eScan Auto-Backup/Restore Utility and the eScan Remote Support Utility that will help in providing support to its customers.

Govind Rammurthy, Managing Director and CEO of eScan said, "We at eScan have always been at the forefront in offering solutions that meet the ever-changing requirements of our customers. Making eScan compatible with Microsoft Windows 7 operating system helps to offer our customers benefits such as including improved security and support. Customers with older versions of eScan can download the latest eScan Hotfix at <http://www.mwti.net/hotfix> to make their eScan compatible with Windows 7. We are also glad to announce that a few Microsoft distributors also took the opportunity to bundle eScan with Windows 7 on the eve of the Windows 7 launch."
