eScan Proves Unmatched Consistency

India Infoline News Service / 09:06 AM , Oct 16, 2009

eScan, one of the leading Information Security solution that provides proactive protection against virus, spam, Trojan, and many other information security threats

User Friendly Interface
Impressive Detection Rate
Lowest / Zero False Positives

eScan, one of the leading Information Security solution that provides proactive protection against virus, spam, Trojan, and many other information security threats, has received an Advanced+ Award from AV-Comparatives and another VB100%. eScan 10 has already been awarded certification by both bodies earlier this year.

Constantly winning national and international accolades, eScan 10 an impressive array of certifications from almost all well known testing bodies of the IT security industry like AV comparatives, PC Magazine and many others. These awards and certifications indicate a robust and proactive R&D support of eScan, which is constantly upgrading the solution to match pace with the ever increasing cyber threats and providing its users upgraded security.

The Advanced+ AV-Comparatives award is given to security solutions that display lowest (97-100%) detection rates and eScan is one of the few brands to have qualified within this category. Among 16 solutions tested, eScan was among the top few to have run with highest settings by default and showing lowest false positives. In the VB100% test showed eScan as the simplest and most straightforward solution to install, making its GUI user friendly. Displaying an impressive detection rate, eScan handled the WildList, and all the polymorphic samples tested, without difficulty and raised no false alarms in the clean set.

"At eScan we understand that security is not a one-time task. It has to evolve constantly in order to be a step ahead of the threats prevailing in the environment. Therefore, our team is 24x7 involved in upgrading its solutions to provide users with complete protection from upcoming threats," explained Mr. Govind Rammurthy, CEO & MD, MicroWorld.

"Winning international accolades gives our team an impetus and recognition for the hard work and also brings forth a challenge to better themselves the next time. I strongly believe that with these certifications eScan will raise the bar for the industry and help educate our customers in making their security solution purchase decision," he further added.
