## eScan Antivirus

*Complete Antivirus Solution for Windows based home users.*

### Key Features

**Simple user friendly GUI for easy access**

eScan v10 provides you with a user friendly graphical user interface that is designed to suit the needs of both the novice and expert users. This GUI offers a single screen access to both the Virus Monitor and the On Demand Scanner.

### Pro-Active Protection

eScan version 10 scans, monitors, warns the user about any applications which behave suspiciously.

### Access Internet without fear

eScan v10 provides a two-way

inbuilt firewall that monitors both the incoming & outgoing network activities in the system and safeguards the computer from network based attacks.

### Scan faster

eScan's new On-Demand Scanner is equipped with the Cache technology that scans faster and is lighter on system resources. It also scans USB drives, Spyware and Adware.

### Fearlessly send/receive mails, share files, download files

eScan v10 does real-time virus scanning of files, applications, emails, email attachments and websites using the MicroWorld Winsock Layer (MWL) technology

and Heuristic Algorithms.

### Multi-level protection

eScan v10 provides multi-level protection from Viruses, Trojans, Worms, Spyware and many more Information Security threats using various technologies such as Application Control, MWL Technology, NILP Technology, Endpoint Security, Domain Black-listing, Firewall, etc.

### Continuous protection against latest threats

Automatic hourly program as well as definition updates to protect against zero day threats.

Experts available round the clock to solve your queries

Round the clock free telephonic and online technical support

(via email, chat and forums).

### eScan Antivirus for Small and Medium Businesses (SMBs)

eScan Antivirus solution for SMBs is a complete Antivirus, AntiSpam and Content Security solution designed to provide zero day protection to organizational networks

### Key Features

#### New User Friendly GUI

The graphical user interface of eScan version 10 is designed to suit the needs of both the novice and expert users. There is a single screen access to both the Virus Monitor and On Demand Scanner.

#### Pro-Active Protection

eScan version 10 scans, monitors, warns the user about any applications which behave

suspiciously.

#### Inbuilt Firewall

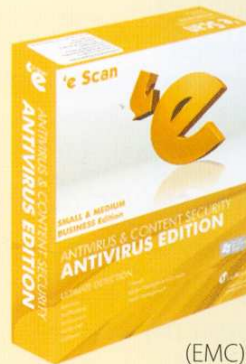

The inbuilt firewall monitors both incoming/outgoing network activities in the system and safeguards the computer from network based attacks.

#### Faster On-Demand Scanning

The On-Demand Scanner equipped with Cache technology scans faster and is lighter on the system resources. It also scans USB drives, Spyware and Adware.

#### Real-Time Scanning

eScan does real-time virus scanning of files, applications, emails, email attachments and websites

including SMTP, POP3, HTTP and FTP traffic using MWL technology and Heuristic Algorithms.

### eScan Management Console

The eScan Management Console

(EMC) empowers system administrators to deploy from a central dashboard security measures such as updates of virus signatures & spam definitions, licenses, send alerts about virus outbreaks and security violations, and enforce an Integrated Security Policy across the network of an enterprise. Administrative tasks can also be performed via Web using a browser.
