eScan Internet Security Suite

eScan Internet Security Suite for SMB is a comprehensive Antivirus and Content Security solution that safeguards your computer from Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers, Phishing, Objectionable content and many more similar threats.

User Friendly GUI

The graphical user interface of eScan has been designed to suit the needs of both novice and expert users with a single screen access to both the virus monitor and the on-demand scanner.

Faster On-Demand Scanning

eScan's new On-Demand Scanner with Cache Technology leads to faster scans and is light on system resources.

Real-Time Scanning

eScan does real-time virus scanning of files, emails, email attachments and websites including SMTP, POP3, HTTP and FTP traffic using the MWL Technology and Antivirus Heuristic Algorithms.

Heuristic Scanning

eScan's sophisticated AntiVirus Heuristic Algorithm detects unknown viruses, that are being continuously released

Antispam

eScan controls spam effectively using indigenous technologies such as NILP** and sophisticated Heuristic filters that work on the basis of specific keywords and phrases.

Web Protection

eScan provides comprehensive

Web Protection with an in-built Parental Control that blocks offensive and unsuitable websites as per the user's choice and the effective Pop-up Filter blocks all the Pop-ups saving bandwidth.

Proactive Protection

eScan monitors the registry for any changes and warns the user on detecting any changes in the registry. eScan also detects and warns about the applications that are suspicious in nature.

Endpoint Security

Endpoint Security prevents data thefts and virus infections through USB/Firewire based portable devices such as Flash Drives, Pen Drives, Portable Hard Disks etc. Application Control allows you to block/permit applications on the networks/ personal systems. **Firewall**

eScan's in-built firewall monitors and logs both incoming and outgoing network activities in the system and protects it from all network based attacks.

eScan Management Console

The eScan Management Con-

sole (EMC) empowers system administrators to deploy from a central dashboard security measures such as updates of virus signatures & spam definitions, licenses, to send alerts about virus outbreaks and security violations, and to enforce an Integrated Security Policy across the network of an enterprise.

Asset Management

Static Asset management empowers the administrators to have complete information about the hardware and software deployed on the networks.

Logs and Extensive Reports

Logs and extensive reports are being created and displayed by all the modules for PROTECTION, SCAN and UPDATE.

eScan Remote Support

eScan Remote Support (ERS) works with the help of remote desktop connection which enables eScan Support technicians to access computers with problems from a remote location and troubleshoot them directly.

eScan Auto Back-up / Restore

eScan Auto Back-up / Restore utility takes backup of all the frequently used files (PE files) and stores it in an encrypted form. If an infection is found, eScan's Auto Back-up / Restore utility will restore back all the clean files in real-time without the need to format the system.
