

## **eScan secures all the computers in the Duisburg City Council Schools**

Place, 01/17/2011. eScan, the award winning Anti-Virus and Content Security Solution from MicroWorld has been selected to secure all the 162 schools in Duisburg, Germany. This contract to secure the computer network of schools was awarded to HJM Computer Service, one of the premier eScan partners in Germany.

When the tender for securing the computers of the schools in Duisburg was announced in 2010, eScan and HJM-Computerservice worked closely to create the winning bid for the tender. All the products that participated in the tender underwent rigorous trials. The evaluators and IT administrators of the school networks found that eScan Corporate Edition not only had many more features but also found the eScan Management Console, the centralized admin console available in eScan, to be the perfect match for their IT security needs. The other brands that participated in the tender include Kaspersky, McAfee, and Norman.

Speaking on this development, Mrs. Shweta Thakare, the Sales Head, Europe of eScan said, “We are very happy to have bagged this order and as part of our contribution towards securing the schools in Duisburg, we are also offering free upgrade to the next version of eScan Corporate Edition that will be released shortly. This project highlights not only the superior performance of our eScan range of products, but also the kind of the pre and post sales support that we provide to our Partners to help expand their business.”

Mr. Heinz-Josef May, the Managing Director of HJM-Computerservice added, “The cooperation between the HJM-Computerservice & MicroWorld grew very much during this project, be it in pricing or in the shape of the licensing model. The city of Duisburg has now got eScan, a very powerful and sophisticated program at a very fair price. Both the collaboration between MicroWorld, and HJM Computerservice on one hand and between the Government and HJM computer service, on the other side, went smoothly from our point of view and to the satisfaction of all sides.”

### **About eScan**

eScan, the world's first Real-time Anti-Virus and Content Security software for desktops and servers is developed and marketed by MicroWorld. It is powered by innovative and futuristic technologies, such as MWL Technology, DIRC Technology, NILP Technology, and sophisticated Anti-Virus Heuristic Algorithms that not only provide protection from current threats, but can also provide proactive protection against evolving threats. It has achieved several certifications and awards from some of the most prestigious testing bodies, notable among them being Virus Bulletin, AV-Comparatives, West Coast Labs (Checkmark), ICSA, and PCSL labs. Combining the power of various technologies, eScan provides Multilevel Real-time Protection to Computers and Networks. Visit [www.escanav.de](http://www.escanav.de) for more information.
