eScan Server Edition (Internet Security Suite with Cloud Security)

All business segments are more vulnerable to malware and zero-day attacks against their systems. Valuable business information, online transactions and sensitive data are all at risk.

Smaller businesses face the same security risks as large organizations, but often lack time or resources to configure and manage complex IT security solutions. eScan Server Edition is specially designed to be simple to install, configure and run in order to protect your Windows-based desktop and servers.

Note: Signature Updates can be downloaded from the UNC Path in eScan Server Edition.

Key Features and Benefits

eScan Security Network (Cloud Technology – detects new and unknown threats)
eScan's Cloud-based Security Network collects information from millions of eScan participant user's computers around the world when they are online, to safeguard your digital world from latest and unknown threats.

Advanced Virus Control (Smart Proactive Protection)
With new Advance Virus Control technology and highly sophisticated Heuristics Algorithms, eScan effectively scans and detects unknown malware and even detects and warns users about applications that behave in a suspicious manner.

Real-time Protection
eScan protects you from advanced blended threats by integrating both its Advanced Virus Control technology and Real-time protection, thus allowing you to enjoy your digital life, at its best.

Faster On-Demand Scanning
eScan's enhanced On-Demand Scanner comprises of smart Whitelisting Technology that leads to faster scan of files, folders, memory, registry, services and all storage devices. Being light on the system resources, it ensures that the performance of your computer is not affected even while eScan is performing thorough system scans.

Effective Endpoint Security
eScan effectively prevents data thefts and Virus infections via USB or Firewire-based portable storage device, such as Flash Drives/Pen Drives, SD Card, Imaging devices, Webcam and Portable Hard Disks, thus securing your network from evolving cyber threats. Its advanced Application Control feature allows you to block/ permit applications on the local computer, thus safeguarding you from critical threats.

eScan's Application Control includes Whitelist module that allows execution of only selected applications, while restricting the execution of rest.

Two Way Firewall (Improved)
It filters incoming and outgoing network activities on the computer and protects it from all types of network-based attacks. It also includes a set of predefined access control rules that the user can customize to filter network traffic.

Automatic Downloads of Critical Windows® OS Patches
eScan automatically checks and downloads critical patches for the Windows® operating system from the Microsoft® Website, thus preventing malware from exploiting vulnerabilities existing in the operating system.

eScan Rescue Mode
It is an advanced feature which allows user to boot into a secure environment during system startup without using any optical media. It uses Windows®-based environment that not only helps you to scan and clean the system but also allows you to fix registry changes made by viruses and Rootkits.

Language Versions

English, German, French, Nederlands, Italian, Portuguese, Spanish, Turkish, Chinese Simplified, Chinese Traditional, Greek, Korean, Norwegian, Russian, Polish, Latin Spanish, Japanese and Brazilian Portuguese.
