eScan Total Security - Premium
Home and Small Office Edition

eScan Total Security Premium for Home and Small Office Edition is a specially designed security solution package that provides real-time protection to devices and computers with Windows, Android, iPhone, Macintosh and Linux operating systems from objectionable content and evolving cyber threats through a single license key. It gives you freedom to conveniently enjoy the internet to its full potential on a range of digital devices.

With its advanced futuristic technologies, such as MicroWorld Winsock Layer, Domain and IP Reputation Checker, Non-Intrusive Learning Pattern, eScan Security Network, Advanced Virus Control and sophisticated Heuristics Algorithms. eScan Total Security Premium secures your personal information and ensures safe computing environment to your family when browsing the internet, shopping online, performing online transactions, or social networking.

Key Benefits

WINDOWS

eScan Security Network (Cloud Technology – detects new and unknown threats)
The cloud-based eScan Security Network (ESN) ensures protection against current threats, such as viruses, worms and Trojans. It identifies and blocks new threats. In case of new malwares, it makes a prompt response with an advanced level of detection that provides superior protection.

Advanced Virus Control (Smart Proactive Protection)
With new Advanced Virus Control technology and highly sophisticated heuristics algorithms, eScan effectively scans and detects Zero Day Threats that are continuously released by malware writers.

Parental Control
Parental Control uses highly advanced algorithms to block the access of restricted websites, based on multiple categories. This feature is extremely beneficial for parents because it prevents kids from accessing unwanted websites containing vulgar or inappropriate content. It also allows the users to create different types of profiles for different users. Each profile will have different access rights and web access controls.

Secure Delete
This option removes all the traces of the selected files and folders forever. It eliminates all the possibilities of recovering deleted files with any recovery software.

Anti-Theft
This technology prevents your Windows device from any kind of misuse. It allows you to lock your device or erase all the selected data remotely, if it gets lost or stolen. The technology offers another layer of protection against theft with more advanced features that capture images, screenshots, scream, alert, lock and locate.

Faster On-Demand Scanning
eScan's enhanced On-Demand Scanner comprises of smart Whitelisting Technology that leads to faster scan of files, folders, memory, registry, services and all storage devices. Being light on the system resources, it ensures that the performance of your computer is not affected even when eScan software is performing thorough scans.

Effective Endpoint Security
eScan effectively prevents data thefts and Virus infections via USB or Firewire-based portable storage device, such as Flash Drives / Pen Drives, SD Card, Imaging devices, Webcam and Portable Hard Disks, thus securing your network from evolving cyber threats. Its advanced Application Control allows you to block / permit applications and prevents critical threats.

Identity Protection
This module protects sensitive personal information, such as credit card numbers, mobile numbers or passwords for online services. Upon detecting any attempt to send protected information to the Internet by email or instant message, the transmission can be blocked automatically.

eScan Rescue Mode
It is an advanced feature that allows you to boot into a secure environment during system startup without using any optical media. It uses a Linux -based environment that helps you to scan and clean the system.

For more information on Rescue Mode please visit https://www.escanav.com/erm

eBackup
eBackup allows you to take back-up of your important files and folders. It will also allow you to schedule the backup process as per your requirement, you can select the path to save the backup files or save the files to an external hard drive or USB as well.

TSPM
Terminal Services Protection Module by eScan not just detects the brute force attempts but also heuristically identifies suspicious IP Addresses / Hosts. It blocks any attempts to access the system.

ANDROID

Effective Real-Time Scanning
eScan scans your device on real-time basis and provides protection against malware, Trojans and other cyber threats. It automatically scans all newly downloaded files and installed applications on your Android-based device, thus keeping it safe from malware infections.

Call Filter
eScan Mobile Security for Android facilitates call filtering based on parameters. A user can block calls from specified numbers. Under the Whitelist feature, only whitelisted calls are allowed to the device, while all other calls are blocked. If the numbers are added to the Blacklist, then those numbers are blocked from calling.

Backup and Restore of Contacts
eScan Mobile Security for Android facilitates backup of all Contacts on to the memory card or to Cloud (Google Drive Account). The backup can be restored to the device as per your requirement.

Effective Web Protection and Parental Control
eScan facilitates you with advanced web protection and parental control features that provides an extra layer of security to your Android-based device. It categorizes and detects the websites that the user visits. eScan blocks phishing or malware-infected websites in real-time, thus safeguarding Android-based device against evolving cyber threats. eScan supports Android's default browser, Samsung-S browser and Google Chrome.

Effective Application Control
eScan comes with an Application Control feature that blocks access to applications, unless specified. By default, all downloaded applications are blocked and access to these applications is only allowed by entering password.

Scheduled Scanning
eScan performs scheduled scans in the background, either for all the files / directories in the internal and external storage or the entire device at your desired time, thus providing you the best protection against evolving cyber threats.

Privacy Advisor
eScan comprises of Privacy Advisor that provides you the complete list of application using device permissions in a classified format. This helps you to keep a check on the security level of all installed applications.

Anti-Theft
eScan's Anti-theft module is equipped with advanced features such as remote Device blocking, Data Wipe, SIM watch, and locating your device through GPS. With its Anti-Theft feature, eScan ensures complete protection to your device from any unauthorized access on the event, if your device is lost or stolen. eScan Mobile Security is equipped with SIM based Anti-theft feature whereas eScan Tablet Security is equipped with an online Anti-theft module.

User-Friendly GUI
eScan has a trendy Graphical User Interface that is designed to suit the needs of both novice and expert users. It has a sleek intuitive design that is simple and easy-to-use. eScan requires very less memory to operate, and hence does not affect the performance of your device.

iPhone
Anti-theft
Advanced anti-theft feature helps you to locate your device if lost or stolen. You can make your device scream or send any message that can be displayed on the device to improve its chance of getting back. In addition, it allows you to take the user's photo who holds your device through online anti-theft portal.

Safe Surfing
It helps you to select website categories to allow or block in eScan browser.

Facebook Privacy
iOS Mobile Security can configure your Facebook account and control privacy settings. It detects all the privacy concerns in your account and allows you to define settings for those concerns, such as who can search you on Facebook using the phone number or email address that you have provided.

QR Code Scanner
After the scanning process gets over, it displays the category of the scanned URL. In case it comes under Malware category, then eScan highlights it in red.

Note – eScan will not scan and Filter URL if the scanned QR code contains text along with the URL.

Privacy Advisor
The privacy of your device can be at stake if some unwanted apps use the location services. You can even optimize the battery life of your device by allowing location access to limited apps.

MAC
Effective Real-Time Scanning
With more and more people using Mac computers, there has been a rapid growth in Mac malware where in cyber criminals are targeting Mac users to infect or steal their data. eScan scans your Mac OS X based computer on real-time basis and safeguards it against sophisticated Internet-based threats.

Endpoint Security
eScan enables blocking of USB-based Storage devices, thus preventing data theft and transmission of Viruses, Trojans or any other malware.

Anti-Adware
eScan helps you get rid of malware, unwanted ads and applications such as tracking cookies.

Anti-Rootkit
eScan effectively scans, detects and removes hidden Rootkits on your computer, thus ensuring you a secured computing experience.

LINUX
On-Demand/ Command Line Scanning
eScan works as an on-demand software application that can be invoked as per your requirements. It consists of Command Line and Graphical User Interface (GUI) Scanner. It facilitates selected Directory Scan, Local hard disk and Home Directory scanning as well as Memory Scan to ensure complete protection from cyber threats.

Scheduled Scanning
eScan consists of separate settings for Scheduled Scanning Option that helps to schedule automatic scans on your system at a preset time. It also includes Command line scanner that facilitates automation and scheduling of the scanning. Once the threats are detected, preset actions are followed.

Data Stream Scanning
eScan scans the data stream of a file to detect hidden malware, which consists of all types of files including zipped and archived file.

User Defined Scanning
eScan helps you select and scan any directory or file on your computer. It also scans the running processes in your system to detect memory resident malware.

Logs and Extensive Report
eScan generates a comprehensive log of scanning activity with date and time of scanning, along with the path and name of objects scanned for further analysis.

Minimum System Requirements

For Windows OS
Operating System:
- Windows® 10 / 8.1 / 8 / 7 / Vista® / XP Service Pack 2 or higher / 2000 Professional [All 32-bit and 64-bit Editions]

CPU: 1GHz recommended
Disk Space: 1 GB
Memory: 1GB
Language: Multilingual

For Android
eScan Mobile and Tablet Security
- **Operating System-** Android 3.2 and above or Cynaogen OS 12.0
- **Minimum Disk Space-** 40-50 MB
- **Others -** Internet Connection

For iPhone
eScan Mobile Security for iPhones & iPads
Compatible OS: iOS 6.0 or later
Device Space: 20-25 MB space
Memory: 40-45MB (varies by device)

Other: 3G/4G (LTE) or Wi-Fi Internet connection required for download.

For Mac OS X
- **Supported version of Mac OS X** - Mac OS X Snow Leopard (10.6 or later), Mac OS X Lion (10.7 or later), Mac OS X Mountain Lion (10.8 or later), Mac OS X Mavericks 10.9, Mac OS X Yosemite (10.10 or later), Mac OS X El Capitan (10.11 or later), macOS Sierra(10.12 or later), macOS High Sierra (10.13 or later), macOS Mojave (10.14 or later).
- **CPU** - Intel based Macintosh
- **Memory** - 1 GB and More recommended
- **Disk Space -** 1 GB and above

For Linux OS
- **Supported Linux Distributions-** RHEL 4 & above / CentOS 5.10 & above / SLES 10 SP3 & above / Debian 4.0 & above / OpenSuSe 10.1 & above, Fedora 5.0 & above / Ubuntu 6.06 & above (All 32-bit & 64-bit Editions)
- **CPU-** Intel® Pentium compatible or equivalent.
- **Memory-** 1 GB and above
- **Disk Space-** 1 GB free hard drive space and above for installation and storage of temporary files.
