System Requirements

Prior to installation your device must meet the following criteria:

- **Operating System**: Android 2.2 and above
- **Minimum Disk Space**: 2.4 MB
- **Others**: Internet connection
Installation/Uninstallation Process

This section provides you information on how to download and install/uninstall eScan Tablet Security for Android on your device.

Contents

- Downloading eScan Tablet Security for Android
- Installing eScan Tablet Security for Android
- Installing from Memory Card
- Installing from Online
- Installing from CD/DVD-ROM/USB/Flash drive
- Installing from PC to Device
- Uninstalling eScan Tablet Security for Android
- Downloading eScan Tablet Security from Google Play

Downloading eScan Tablet Security for Android

eScan provides you the following ways of downloading eScan Tablet Security application:

- Clicking http://www.escanav.com/dwn/tablet link on our website.

Installing eScan Tablet Security for Android

Installing eScan Tablet Security is very simple. You can download and install from any of the following methods –

- Installing from Memory Card
- Installing from Online
- Installing from CD/DVD-ROM/USB/Flash drive
- Installing from PC to Device
Installing from Memory Card

eScan allows you to manually install eScan Tablet Security on your device. You need to first download the .apk extension file from our eScan website by clicking the http://www.escanav.com/dwn/tablet link.

To install from memory card

1. Locate and click/tap the escantab.apk file from your tablet computer.
   
   The Do you want to install this application dialog box appears. Refer Figure 1.

![Figure 1](image1)

2. Click/tap the Install button.
   
   The application successfully installed message appears. Refer Figure 2.
Figure 2

3. Click/tap the **Done** button to start the application later or click/tap the **Open** button to run the application.

**Installing from Online**

You can easily download and install eScan Tablet Security from Android market service, by simply entering “eScan Tablet Security” in the **Search** field or download the **escantab.apk** file by clicking the [link](http://www.escanav.com/dwn/tablet) from our website.

After you download the **escantab.apk** file, tap the file to start installation.

**Installing from CD/DVD-ROM/USB/Flash Drive**

After you insert/connect CD/DVD-ROM/USB/Flash drive into the drive, copy eScanxxx.apk file to your computer, and then transfer the **escantab.apk** file by connecting your device to computer, and then tap the file to start installation.
Installing from PC to Device

Download escantab.apk file either from Android market service or eScan www.escanav.com website, and then transfer the escantab.apk file by connecting your device to computer, and then tap the file to start installation. Uninstalling eScan Tablet Security for Android

Perform the following steps to uninstall the application:

To uninstall the application

1. Click/tap the device main menu.  
   A list of all menu’s screen appears.
2. Click/tap the Settings menu.  
   The list of settings screen appears.
3. Click/tap the Applications option.  
   The Applications Settings screen appears.
4. Click/tap the Manage applications option.  
   The Manage applications screen appears.
5. Click/tap the eScan Tablet Security, and then click/tap the Uninstall button.  
   A confirmation message appears.

   If you have parental control running you will be asked to enter password otherwise it will not ask for password while doing uninstallation.

6. Click the OK button.  
   The application successfully gets uninstall.

Downloading eScan Tablet Security from Google Play

You can download eScan Tablet Security from Google Play. Open Google Play on your Tablet and search for eScan Tablet Security, now click on Install button to install it on your tablet.
Registering and Activating the Application

You need to activate the application for using the eScan Tablet Security features. eScan provides you both online and offline activation as per your convenience. eScan facilitates you with two different methods of activating the product — Internet and SMS.

Contents

- Registering a Trial Version
- Registering the License Key
- Entering the License Key
- Activating the License Key
- Activating through Internet
- Activating through SMS
- Registering and Activating the Trial Version

Registering a Trial Version

- **Setting Secret Code** - When you start the eScan Tablet Security on your device for the first time after installation, you will be asked to set the Secret Code. It is mandatory to initialize eScan application for functioning, as shown below in Figure 3.

![Figure 3](image-url)

Set a Secret Code

Set Secret Code

Re-Enter Secret Code

It is mandatory to set a secret code to initialize eScan application for functioning. A secret code should contain only digits, minimum 4 digit and maximum 15 digit are accepted. Kindly memorize the secret code set as it will be used for accessing eScan settings.
- **Registering Trial Version** - After setting the Secret Code, click/tap on the **Next** button and enter the Registration details, as shown below in **Figure 4**.

![Registration Details](image)

**Figure 4**

- Click/tap on **Activate Online** button present on the screen. This will register the **Trial Version** of **eScan Tablet Security**. You can run the trial Version for a period of 14 Days, after which you have to register for the Licensed Version using a License Key.

- After the installation is over, you will be informed through a Pop up message. **Click / Tap on OK** button present on the screen. The system will pop up a message to activate **Device Administrator**.
Activating Device Administrator

- After Activating the Trial Version, you will be prompted to activate the **Device Administrator** through a pop up message, as shown below in Figure 5.

![Figure 5](image)

- Click/tap on the Next button present on the Pop up, you will be forwarded to the **Activate Device Administrator**? Screen, as shown below in Figure 6.
Click/tap on the Activate button to activate the Device Administrator. You will be forwarded to the Main Interface of the eScan Tablet Security.

Registering the License Key

eScan offers a single license for a single device. While purchasing the product online you need to provide a valid e-mail ID because the product license key is only sent to you on the mentioned e-mail ID or if you are purchasing product box, license key is already included in it.

After you have purchased and installed the eScan Tablet Security, you have to enter valid license key for registration. After registration, you can choose either Internet or SMS mode for activation, as per your convenience.

You have the following two options: Refer Figure 7.
• **Enter License Key**: Click/tap this button, to apply the license key, which you receive from online purchasing or with the product box.

• **Purchase Online**: Click/tap this button, if you want to purchase the product online. You can download either from Android market service or eScan [www.escanav.com](http://www.escanav.com) website. After downloading, you can activate from internet or SMS.
Entering the License Key

Once you have received the license key, you need to enter license key for activating the product. The license key is a 30 character key, for example XXXX - XXXX - XXXX - XXXX - XXXX - XXXX - XXXX - XXXX - XXXX - XXXX - XX

To enter the license key

1. Click/tap the Enter License Key button.
   The Registration Details screen appears. Refer Figure 8 and Figure 9.

![Registration Details](image-url)

<td><a href="mailto:xxxx@xxxx.com">xxxx@xxxx.com</a></td>
</tr>
<tr>
<td>Email 2</td>
<td><a href="mailto:xxxx@xxxx.com">xxxx@xxxx.com</a></td>
</tr>
<tr>
<td>Email 3</td>
<td>XXXX</td>
</tr>
</tbody>
</table>

*Field is mandatory*

Note: Kindly enter a valid email id in order to retrieve recovery code

**Figure 9**
2. Specify the following field details:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name</td>
<td>It indicates the name on which you want to register. Type the name.</td>
</tr>
<tr>
<td>email address*</td>
<td>It indicates the e-mail ID of a registered user or any user. This is a mandatory field. You have to enter a valid e-mail ID as whenever you request for recover secret code an e-mail is sent to your e-mail address.</td>
</tr>
<tr>
<td>Confirm email address*</td>
<td>Re-type the e-mail ID for confirmation.</td>
</tr>
<tr>
<td>Country</td>
<td>Type the country name.</td>
</tr>
</tbody>
</table>

3. Click/tap the Next button.
The following screen appears. Refer Figure 10.

![Figure 10](image-url)
4. Type the 30 character license key in the **Enter 30 character License key** field, and then click/tap **Next** button. The Activation Mode screen appears. Refer **Figure 11**.

![Figure 11](image)

5. Click/tap an appropriate option.

- **Activation Mode:**

  **Internet:** Click/tap this option if you want to do online activation. When you choose this option the product immediately gets activated.

  **SMS:** Click/tap this option if you want to do offline activation. When you choose this option it takes at least 48 hours to get the product activate considering you sent an sms on Saturday. If it is a normal working day you will receive the activation code in the same working day.

6. Click/tap the **Next** button.

   The application successfully activated message appears.
Activating the License Key

You need to purchase the product online before registering the product, and it is only after successful registration that you can activate the product. You have two modes of activation — Internet and SMS. After purchasing and registration, you can choose whichever mode of activation you want as per your convenience.

If you are activating through internet, the product immediately gets activated and if you are activating through SMS it takes at least 48 hours to activate.

For more information on how to register and enter the license key, refer Registering the License Key and Entering the License Key section.

SMS activation method is only supported on SIM based devices.

Activating through Internet

The eScan Tablet Security allows you to activate the product online. You need to have an active internet connection for activating online. After the product gets activated you can view the expiry date information in About eScan under Additional menu.

To activate through internet

1. On the Activation Mode screen, click/tap Internet option. By default, Internet is selected.

2. Click/tap the Next button.

The application successfully activated message appears. You can see the expiry date of your registration under About eScan
Activating through SMS

The eScan Tablet Security also allows you to activate the product offline. You can activate through SMS, in case if you don't have internet connection. But, it is recommended to register through internet as it is a fastest, easiest, and cheapest way of activation. After the product gets activated you can view the expiry date information in About eScan under Additional menu.

To activate through SMS

1. On the Activation Mode screen, click/tap SMS option. By default, Internet is selected.
2. Click/tap the Next button.
3. eScan sends you an activation code on your Tablet and simultaneously activates the product. It takes at least 48 hours for activating. Once it is activated, you get a message of successful activation.

_registration through SMS charges you as per the subscriber's SMS standard rates. Also the Tablets which does not have SIM card they cannot use SMS option to activate the license. They can use Internet mode to activate the license._
Getting Started

This section provides you information on how to start the application and gives you a brief idea on the graphical user interface.

Contents

- Setting the Secret Code
- Recovering the Password
- Starting Application
- Understanding the Graphical User Interface
- eScan Tablet Security main screen
- Status Icons

Setting the Secret Code

At first-time installation and after accepting the license agreement, eScan Tablet Security asks you to set the secret code, which prevents you from unauthorized access to the applications. No one can access your applications or install/uninstall any applications without your permission. You can also change the secret code later from Additional Settings. For more information on how to change secret code, refer Changing the Secret Code section.

 resil The secret code should be minimum 4 and maximum 16 digits.
To set secret code

1. On the Set a Secret Code screen. Refer **Figure 12**

   ![Set a Secret Code](image)

   **Figure 12**

   - Type the eScan Tablet Security secret code in the Set Secret Code field.
   - Re-type the eScan Tablet Security secret code in the **Re-Enter Secret Code** field for confirmation, and then click/tap the **Next** button.

   4. The **Registration Details** screen appears. Refer **Figure 8** and **Figure 9**. For more information on how to register and activate the application, refer Registering and Activating the Application section.
Recovering the Password

The eScan Tablet Security allows you to recover your secret code in case, if you have forgotten or lost the secret code. You need to specify a valid e-mail ID in the registration details because recovery of secret code is sent to your e-mail address.

To recover password

1. On any of the secret code screen, press the MENU button of your device. It displays a pop-up window at lower side of the screen. Refer Figure 13.

2. Click/tap the Recover Password option. The recovered password successfully sent to your registered e-mail ID message appears.

While recovering password, please make sure you have an active internet connection.
Starting Application

After installation, you can start and access the application only by entering the secret code. For more information on how to set secret code, refer Setting the Secret Code section.

To start the application

1. Click/tap the device main menu.
   A list of all menu’s screen appears.
2. Click/tap the eScan Tablet Security.
3. The Enter Secret Code: screen appears. Refer Figure 14.

4. Type the eScan Tablet Security secret code, in the Enter Secret Code: field, and then
5. Click/tap the Enter button.
   The eScan Tablet Security main screen appears. Refer Figure 15
Understanding the Graphical User Interface

The eScan Tablet Security has a very simple and easy to use user interface, which gives you a quick access to all the features. It contains the following menus: Refer Figure 15.

- **Anti-Virus**: a real-time scanning and protection against viruses, infections, and other threats
- **Parental Control**: Allowing and blocking specific websites and applications
- **Privacy Advisor**: This section displays the list of applications installed on the Tablet along with the permissions used by them.
- **Anti – Theft** – This section helps the user to trace, Lock, or Wipe the Data on Tablet through an online profile in case of a lost or theft of the device.
- **Additional**: Configuring additional advanced settings
eScan Tablet Security main screen

Following are eScan Tablet Security’s main menu:

- Anti-Virus
- Parental Control
- Additional

Following are eScan Tablet Security’s sub-menu:

Sub-menu’s under **Anti-Virus** menu:
- Scan
- Update
- Settings

Sub-menu’s under **Parental Control** menu:
- Mode: X (X indicates type of mode, displays the type of mode selected)
- Blocked Applications
- Block Websites

**Status Icons**

This section provides you information on the types of status icons that eScan Tablet Security displays:

- **eScan icon** (green): It indicates that the database is updated and protection is enabled (Protection is in ON mode). This status indication you can view on the status bar on upper-left corner of the screen and also on the **Notification** screen.

- **eScan icon** (grey): The eScan icon in grey colour indicates that the protection is disabled (Protection is in OFF mode).

- **Help icon**: Click/tap this icon to view eScan Tablet Security online help located at top-right corner of the screen. You can also view specific screen help of a particular screen, by pressing the **MENU** button of your device, which enables a help to pop-up at lower side of the screen, where you can simply click/tap to view help.
Anti-Virus Scan and Protection

eScan Anti-Virus scans your device on real-time basis and provides security against malware’s, trojans, and other viruses for your tablet computers. eScan real-time protection by default, scans your device, whenever you start, reboot, install, or download applications, thus keeping your device safe from unwanted infections.

Anti-Virus allows automatic and scheduled scanning, it helps you scan the complete device, which includes saved files and folders from internal and external storage.

Contents

- Real-time Scanning
- Downloading Updates
- Configuring Scan Settings
- Configuring Update Settings
Real-time Scanning

The eScan’s real-time anti-virus scans and protects your device against all kinds of malware’s, trojans, and viruses. By default, it scans the applications as and when they are installed, downloaded, running applications, and all the existing, opened, saved files/folders from both the device memory and memory card.

Whenever any new software application is installed or downloaded, eScan’s real-time anti-virus protection immediately performs scanning based on the set parameters under **Settings** menu. eScan’s real-time scanner scans only the .apk extension files and executables. Whenever any virus threat is detected, eScan provides you an alert information message dialog box, and confirms whether you want to delete it or skip the action.

Perform the following steps to scan

1. On the **eScan Tablet Security** main screen, click/tap the **Anti-Virus** menu or click/tap the drop-down icon to expand and collapse the menu. The **Scan**, **Update**, and **Settings** sub-menu appears. Refer Figure 16.

![Figure 16](image-url)
2. Click/tap the Scan sub-menu. The Scan Type: dialog box appears. Refer Figure 17.

![Scan Type: dialog box](image)

**Figure 17**

3. Click/tap any one of the following options, as per your requirement:

- **Full Scan:**
  
  It scans the complete device, which includes both device memory and memory card. Click/tap this option, if want to scan your complete device for any viruses. The scanning automatically starts. A dialog box appears displaying the number of files scanned, threats detected, threats deleted, threats skipped, and scan time.

- **Folder Scan:**
  
  It scans both files/folders present on your device memory and files on memory card. In case, if you have connected your device to computer, it does not scan files/folders of your computer, but only scans those present on device memory and memory card. Click/tap this option, if want to select specific files/folders from your device memory and memory card to scan. A dialog box appears displaying the number of files scanned, threats detected, threats deleted, threats skipped, and scan time.

- **Memory Scan:**
  
  It scans the processes running on your memory card. Click/tap this option, if want to scan only files/folders from your memory card for viruses. A dialog box appears displaying the number of files scanned, threats detected, threats deleted, threats skipped, and scan time.
4. Click/tap the **Cancel** button to close the dialog box.
Downloading Updates

You can update the anti-virus database anytime. To download the updates, click/tap the Update sub-menu under Anti-Virus menu.

It is mandatory that you have active internet connection. By default, updates are not downloaded automatically, since it involves cost if you are on roaming mode. You can manually initiate the download or schedule it.

Configuring Scan Settings

Perform the following steps to configure scan settings.

1. On the eScan Tablet Security main screen, click/tap the Anti-Virus menu or click/tap the drop-down icon to expand and collapse the menu. The Scan, Update, and Settings sub-menu appears. Refer Figure 18.
2. Click/tap the Settings sub-menu. The Settings screen appears. Refer Figure 19.

![Figure 19](image1.png)

3. Click/tap the Scan option. The Scan Settings screen appears. Refer Figure 20.

![Figure 20](image2.png)
4. Specify the following field details:

<table>
<thead>

</tbody>
</table>
Configuring Update Settings

This section helps you know how to configure update settings. To download database you need active internet connection, but even though you have internet, database cannot be downloaded automatically because it involves high cost. You can only schedule updates. You can select a particular day and time in a week or a day of your choice on which you want to download.

Perform the following steps to configure update settings.

1. On the eScan Tablet Security main screen, click/tap the Anti-Virus menu or click/tap the drop-down icon to expand and collapse the menu.
   The Scan, Update, and Settings sub-menu appears. Refer **Figure 21**.
2. Click/tap the Settings sub-menu. The Settings screen appears. Refer Figure 22.

![Figure 22]

3. Click/tap the **Update** option. The **Update Settings** screen appears. Refer Figure 23.

![Figure 23]
4. Specify the following field details:

<table>
<thead>
<tr>

</tr>
<tr>
<td><strong>Update Time</strong></td>
<td>By default, it appears dimmed. This option appears when you select either WEEKLY or DAILY option, under <strong>Schedule Update</strong> dialog box. Click/tap this option to set a specific time at which you want to run updates.</td>
</tr>
</tbody>
</table>

5. Configure the scan settings as required.
Managing Parental Control

The parental control is one of the most important features used by parents to prevent their children from visiting inappropriate content on websites and unwanted applications. You can customize the filters as per your requirement.

Contents

- Parental Control
- Blocking Applications
- Blocking Websites
- Adding websites to Exclusion List
Parental Control

This section provides you information on how you can set filter modes, based on which you can control websites and applications blocking.

Perform the following steps to set parental control mode.

1. On the eScan Tablet Security main screen, click/tap the Parental Control menu or click/tap the drop-down icon to expand and collapse the menu.
   The Mode, Blocked Applications, and Block Websites sub-menu appears. Refer Figure 24

2. Click/tap the Mode: sub-menu.
   The Mode dialog box appears. Refer Figure 25.
3. Click/tap any one of the following options, as per your requirement:

   It indicates the different types of filtering modes. The websites and applications are filtered based on the mode you select.

   - **Off**: Click/tap this option, if you don’t want to run filter. It allows access to all websites and applications. By default, BOTH are selected.
   
   - **Website**: Click/tap this option, if you want to block only websites.
   
   - **Application**: Click/tap this option, if you want to block only applications.
   
   - **Both**: Click/tap this option, if you want to block both websites and applications.

4. Click/tap the **Close** button to close the dialog box.
Blocking Applications

This feature helps you to safeguard all applications from unauthorized access. It blocks all newly installed applications and currently available applications. Whenever you try to access any application, eScan displays a message asking for your permission to access the application; it allows access only by providing the valid password.

You cannot add any third-party browser to the exclusion list, when website blocking mode is selected. If you do so the application will be blocked and you will not have an option to add to exclusion list.

Icon: It indicates the allowed applications.
Icon: It indicates the blocked applications.

To block applications

1. On the eScan Tablet Security main screen, click/tap the Parental Control menu or click/tap the drop-down icon to expand and collapse the menu. The Mode, Blocked Applications, and Block Websites sub-menu appears. Refer Figure 24.
2. Click/tap the Blocked Applications sub-menu. The Application List screen appears. Refer Figure 26.

Figure 26
3. To enable **Blocked Applications** feature, you need to click/tap either APPLICATION or BOTH mode, under **Mode** sub-menu of **Parental Control** menu.

- Click/tap the [ ] Icon to allow and [ ] icon to block application.

> By default Android OS default applications will not be blocked and those application category will be listed as Standard Apps under Application control which will be greyed out.

**Blocking Websites**

This feature helps you to block websites containing inappropriate content, to prevent children from visiting such bad websites which could harm them. It allows you to block websites based on the defined categories. You can also exclude certain websites that you want to allow your children to view by adding them to the exclusion list. The website blocking only supports Android’s default browser, all other browsers installed on the device are blocked.

eScan has a defined website categories, which you can update anytime for latest websites, by clicking the **Update List** button on the **Website Categories** screen. The update list updates all the categories and fetches new websites data from the eScan server. It is recommended that you update the list regularly.

[ ] Icon: It indicates the allowed websites.

[ ] Icon: It indicates the blocked websites.
To block websites

1. On the eScan Tablet Security main screen, click/tap the Parental Control menu or click/tap the drop-down icon to expand and collapse the menu. The Mode, Blocked Applications, and Block Websites sub-menu appears. Refer Figure 24.

2. Click/tap the Block Websites sub-menu. The Website Categories screen appears. Refer Figure 27.

3. To enable Block Websites feature, you need to click/tap either WEBSITE or BOTH mode, under Mode sub-menu of Parental Control menu.

   - Click/tap the Icon to allow and Icon to block websites.

![Figure 27 Website Categories](image)
Adding websites to Exclusion List

This feature allows you to add websites to the exclusion list. Whenever any website is blocked, and if you want to access that website, then you can add to the exclusion list to white list them. You need to enter valid secret code for excluding the websites.

To add websites to exclusion list through application

1. On the eScan Tablet Security main screen, click/tap the Parental Control menu or click/tap the drop-down icon to expand and collapse the menu. The Mode, Blocked Applications, and Block Websites sub-menu appears. Refer Figure 24.
2. Click/tap the Block Websites sub-menu. The Website Categories screen appears. Refer Figure 27.
3. Click/tap the Exclusions button. The Exclusion List screen appears. Refer Figure 28.
4. Click/tap the Add button. The Add Exclusion dialog box appears. Refer Figure 29.

![Add Exclusion dialog box](image)

**Figure 29**

5. Type URL of the website that you want to exclude from filtering and blocking, and then click/tap the Save button. The website gets added to the exclusion List.
Privacy Advisor

The Privacy advisor shows you the entire list of applications installed on your tablet along with the permissions used by those applications; it also gives you an option to uninstall the application, if desired by you. It also shows the count of applications using those permissions on your tablet, as shown below in Figure 30.

![Privacy Advisor](image)

The applications are categorized in various groups based on their utility as well as permissions assigned to them.

![Figure 30](image)
An Example - Viewing the List of applications that have direct access to your contacts and calendar stored on your tablet.

Steps

1. **Click / tap on the Privacy Advisor** option present on the eScan Tablet Security Window. You will be forwarded to the following window, Refer Figure 31.

![Privacy Advisor](image)

- **Development tools**
  Features only needed for application developers.
  
- **Your personal information**
  Direct access to your contacts and calendar stored on the tablet.
  
- **Services that cost you money**
  Allow applications to do things that can cost you money.
  
- **Your location**
  Monitor your physical location.
  
- **Your messages**
  Read and write your SMS, e-mail, and other messages.

![Figure 31](image)

2. **Now Click / tap on “Your personal information”** Link present on the Privacy Advisor Window.
3. This will forward you to the following window showing the list of applications that have direct access to your contacts and calendar stored on your tablet, as shown below in Figure 32.

![Figure 32](image-url)

**Figure 32**
4. You can uninstall any application from the Tablet by Clicking / tapping the Application name present in the list that will forward you to the Uninstall window, click on the Uninstall button for completely removing the application from your tablet, see Figure 33.

**Figure 33**

In this case we have opted to Uninstall Calendar, as shown above.
Anti – Theft

Activating this feature, you can take control of your device using eScan Anti-Theft online portal. In order to register your device, you need to create an online account on the eScan Anti-theft Home Page, once the account is created and activated, you need to register your device through the eScan Anti-Theft Module. Using the online portal, you can Wipe Data, Block Device, Locate the Device using Google Maps or IP address; trigger a sound Alarm to locate the device. Basically, this module is designed for the Tablets without SIM card facility, in order to use this feature you must have an active internet connection enabled. Once you activate this feature, you can easily trace your device in case of lost or stolen.

If your tablet is lost or stolen, eScan Tablet Security includes remotely operated features that help you to protect your personal information and find your tablet’s approximate location. eScan Anti-Theft Web Management provides you with a convenient, web-based control center that gives you remote control of anti-theft features running on your missing tablet.

- **Lock your tablet** – so no one can access your personal information
- **Locate** your tablet’s approximate whereabouts – using GPS, IP Address + Google Maps
- **Trigger an audible alarm** on your tablet – so it’s easier to find your lost tablet
Registering Device for Anti-Theft Services

You can easily register your device to Anti-theft services offered by eScan Tablet Security using following simple steps –

Steps
1. Click / tap on the Anti-Theft option present on the main interface of eScan Tablet Security, as shown below in Figure 34.
2. You will be forwarded to the **Registration Window**, as shown below in **Figure 35**.

![Registration Window](image)

**Figure 35**

3. Click on **Create Account** to register your device to the online Dashboard. You will be forwarded to the following URL, as shown in **Figure 36**. This will create a profile of your Tablet online.

   - [http://antitheft.escanav.com](http://antitheft.escanav.com)
   - or
   - [http://anti-theft.escanav.com](http://anti-theft.escanav.com)
4. Register with a valid email address that you access frequently. On completion of the registration process you will be informed with a “Thank You” message on your Tablet.

5. The system will forward a link to **activate** the **Anti-Theft Module** offered by **eScan Tablet Security** to your registered email address to validate your account. Unless you activate the account using the link sent by eScan online portal, you will not be allowed to login to eScan Anti-theft online portal.

6. After activation, to link your device to eScan anti-theft portal, click/tap on Anti-theft feature it will forward you to screen shown below in **Figure 37**.
7. Enter **Email Address** used by you for registering **Anti-Theft Module**.
8. Enter the **Password** for Login.
9. Give an **Alias Name** to your device, and click on **Login** button to link the device.

- Allocating **Alias Name** to your device will help you in recognizing the device in case of multiple device registrations using same account details.
- Anti-Theft Service will be disabled if you have not activated the **Device Administrator**.
- Activating the **Device Administrator** will ensure that when you lock the device through Anti-Theft online Dashboard, the OS password for unlocking device will be replaced with eScan Secret code. The device can now be unlocked only through eScan secret code.
10. Enable **Anti-Theft** Module by Clicking/ tapping on the **Tick Mark** present on the screen, this will **Add** the device to the Online Profile. The Status will be displayed on the screen, as shown in the below **Figure 38**.

![Enable Anti-Theft Module](image)

**Figure 38**

11. After **Activation**, in case when your Tablet is stolen or lost, you can Login to your Online Profile using the following links –

- antitheft.escanav.com
- anti-theft.escanav.com
12. You will be forwarded to the **Login Page** through which you can trace your device, See **Figure 39**.

![MyeScan Login and Register Form]

**Figure 39**

13. **Login** with the Email Address and Password with which you registered your Tablet for Anti-Theft module.

14. You will be forwarded to online profile / dashboard of your tablet. See **Figure 40**.
15. The **Online dashboard** provides you with the following functionality --

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Wipe Data</strong></td>
<td>This option allows you to delete the Calendar Entries, Call logs and SMS Logs present on the Tablet.</td>
</tr>
<tr>
<td><strong>Device Block</strong></td>
<td>This option allows you to Block the device that prevents unauthorized access to the device.</td>
</tr>
<tr>
<td><strong>Locate Device</strong></td>
<td>This option gives you the approximate location of the stolen device. It is mandatory that you need to have an active internet connection.</td>
</tr>
</tbody>
</table>
16. In addition to the above functions, you can also do the following secondary tasks, if desired –

<table>
<thead>
<tr>
<th>Tasks</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adding Device</td>
<td>This option gives you notification about how to link your device to the online portal.</td>
</tr>
<tr>
<td>Change Password</td>
<td>Click on this link to Change your login Password for the portal</td>
</tr>
<tr>
<td>Remove Device</td>
<td>Click on this Link to remove any added device from the profile</td>
</tr>
</tbody>
</table>

Response of these Services is dependent on the internet connectivity and speed.
Configuring Additional Settings

This section provides you information about the eScan Tablet Security’s additional advanced settings, which includes changing secret code, enabling and disabling notifications, sound notifications. You can configure the following settings as per your requirement.

Contents

- Changing the Secret Code
- Configuring Notifications
- Configuring Sound Notifications
- Writing Logs
- Clearing Logs
- About eScan
Changing the Secret Code

The eScan Tablet Security enables you to change and set new secret code. You can change the secret code, which you have set at the time of first-installation.

To change the secret code

1. On the eScan Tablet Security main screen, click/tap the Additional menu. The Additional screen appears. Refer Figure 41.

![Figure 41]

2. Click/tap the Change Secret Code sub-menu. The following screen appears. Refer Figure 42.
3. Click/tap to type the current secret code in the **Enter current secret code** field, and click/tap the **Next** button. The following screen appears. See Figure 43.
4. Click/tap to type the new secret code, which you want to set in the **Set new secret code** field, and click/tap the **Next** button.

The following screen appears. Refer **Figure 44**.

![Figure 44](image)

5. Click/tap to re-type the new secret code for confirmation in the **Re-enter the new code:** field, and click/tap the **Enter** button.

A message of “**The Secret code has been set**” appears.
Configuring Notifications

Notifications help you to view the eScan Tablet Security status icon on the status bar and also eScan Tablet Security protection status under notification bar.

To configure notifications

1. On the eScan Tablet Security main screen, click/tap the Additional menu. The Additional screen appears. Refer.
2. Click/tap the Show Notification to enable and disable. You can view the notifications, only if you enable the option.

- **icon:** It indicates notification is in enabled mode, which shows you notifications.
- **icon:** The icon in grey color indicates notification is in disabled mode, which does not show you any notifications.
Configuring Sound Notifications

The sound notification provides you sound notifications with a message, whenever any threats or malwares are detected by eScan Tablet Security. You can enable or disable the option to receive sound notification alerts in such events. It is recommended that you enable this option to receive notification alerts.

To configure sound notifications

1. On the eScan Tablet Security main screen, click/tap the Additional menu. The Additional screen appears.
2. Click/tap the **Sound** to enable and disable. You can receive the sound notifications, only if you enable the option.

   - **icon:** It indicates sound notification is in enabled mode, which provides you sound notifications.
   - **icon:** The icon in grey colour indicates notification is in disabled mode, which does not provide you any sound notifications whenever any threats are detected.

Writing Logs

It enables you to create logs on usage, infections, scanning to the root folder of the SD card. The logs are stored in /mnt/sdcard folder with eScan-xxx.log file name.

To write logs

1. On the eScan Tablet Security main screen, click/tap the Additional menu. The Additional screen appears.
2. Click/tap the **Write logs** to enable and disable.

   - **icon:** It indicates write logs is in enabled mode, which creates log.
   - **icon:** The icon in grey colour indicates write logs is in disabled mode, which does not creates any log.
Clearing Logs

It enables you to delete all log files generated by the application.

To clear logs

1. On the eScan Tablet Security main screen, click/tap the Additional menu.
   The Additional screen appears. Refer Figure 41

2. Click/tap the Clear logs to delete.
   A confirmation message appears.

3. Click/tap the Ok button.
   The log files get deleted.
About eScan

It provides you information on the current version number of the product, installed and expiry date of the registration and information about eScan developed by MicroWorld Technologies. It also provides you some important e-mail ID's and copyright information. Click/tap this option to view information about eScan or you can also view by pressing the MENU button of your device, which enables a window to pop-up at lower side of the screen, you can simply click/tap to view information about eScan.
