eScan Anti-Virus (Cyber Vaccine Edition) protects the home network by providing real-time protection. With constantly evolving security threats such as malware, spyware, ransomware, rootkit, and several other threats, eScan keeps an eye on the behavior of all the activities to make sure they don't go rogue. Packed with sophisticated threat detection, machine-learning virus protection, and home network security that won't slow down the PC. It also consists of an advanced two-way firewall, spam filter, gaming mode, and several other techniques that will keep the computer safe, clean, and optimized.

Key Features

Real-time Protection

eScan provides a sophisticated layer of real-time protection to prevent any possible spread of malicious programs. It constantly monitors the system for malware, spyware, ransomware, and various other threats. It detects and restricts malicious threats from accessing the system and exploit personal data. eScan's real-time protection has the potential to keep cyber threats away by continuously monitoring online activities.

Optimized Performance

eScan is equipped with advanced security technologies to reduce the memory and hard drive being used which eventually minimizes the CPU overhead. This, in turn, enhances the speed and performance of the computer making the regular tasks quick and safe. Moreover, using cache technology the scan time is minimized without causing any lag to the system.

Powerful Anti-Ransomware

eScan's effective Anti-Ransomware feature using Proactive Behavior Analysis Engine (PBAE) monitors the activity of all the processes. The Intelligent Shadow Backup mechanism is triggered during any eventualities, this helps users to protect their crucial data and overcome the aftershock of ransomware attacks.

Windows Essential Updates

eScan checks for missing security patches on the system OS by matching the installed patches with the released patch list in the database. After comparing both the patches, it installs the missing Windows critical security patches. This helps to keep the system to stay away from the latest threats and maintain the security of the home network.

Two-way Firewall

eScan Two-way Firewall filters all the incoming and outgoing network requests, which enables you to monitor every inbound and outbound connection that is being established. This locks out hackers from connecting to the system and defends the connection of undesired apps to the internet.

Quicker On-demand Scan

eScan's advanced On-Demand Scanner has built-in Whitelisting and Cache technology that make scanning of files, memory, folder, and all other storage devices, more efficient and quick. Being lightweight, it minimizes the consumption of CPU and memory resources during the scanning process.

Advanced Anti-Phishing

eScan uses a phishing detection technique that detects phishing links, emails, and attachment-based on malicious behavior and blocks automatically every time when they try to reach the email boxes.
