

eScan Mobile Security for Android Home and Small Office Edition

eScan Mobile Security for Android provides protection to your android-based phone against virus attacks, loss, privacy threats, data theft, and more. With its advanced anti-theft features, it secures the data of your lost/stolen devices with its remote lock, Wipe Data and Data Blocking feature.

Highlights

- Secures the data of your lost / stolen device with the Wipe Data feature
- Backup and restoration of Contacts
- Blocks access to downloaded apps, unless specified

Key Features and Benefits

Effective Real-Time Scanning

eScan Mobile Security for Android scans your device on real-time basis and provides protection against malware, Trojans & other cyber threats. It automatically scans all newly downloaded and installed applications on your android-based mobile device, thus keeping your device safe from malware infections.

Call Filter

eScan Mobile Security for Android facilitates call filtering based on parameters. A user can block calls from specified numbers. Under the Whitelist feature, only whitelisted calls are allowed to the device, while all other calls are blocked. If the numbers are added to the Blacklist, then those numbers are blocked from calling.

Backup and Restoration of Contacts

eScan Mobile Security for Android facilitates backup of all Contacts on to the memory card or to Cloud (Google Drive Account). The backup can be restored to the device as per your requirement.

Advanced Web Protection and Parental Control

eScan Mobile Security for Android facilitates you with advanced web protection and parental control features that provides an extra layer of security to your android-based mobile device. It categorizes and detects the websites that the user visits when using Android's default browser, and blocks phishing or malware-infected websites in real-time, thus safeguarding android-based mobile device against evolving cyber threats. In addition, it restricts access to all other browsers installed on the device. To avoid threats and infections, the user is not allowed to access any other browser installed on the device.

Application Control

eScan Mobile Security for Android comes with an Application Control feature that blocks access to applications, unless specified. By default, all downloaded applications are blocked and access to these applications is only allowed by entering the eScan Mobile Security password.

Scheduled Scanning

eScan Mobile Security for Android facilitates scheduled scanning of your android-based mobile devices, thus providing you the best protection against evolving cyber threats. It performs scheduled scans in the background, either for all the files/directories in the internal and external storage or the entire device at your desired time.

Privacy Advisor

eScan Mobile Security for Android comprises of Privacy Advisor that provides you the complete list of application using device permissions in a classified format. This helps you to keep a check on the security level of all applications installed.

Anti-Theft

eScan Mobile Security for Android helps you in blocking, data wiping, SIM watching, and locating your phone through GPS finder. With its Anti-Theft feature, eScan ensures complete protection to your phone from any unauthorized access on the event if your phone device is lost or stolen. The module does not proceed further without the Device Administrator enabled.

Lock Watch

In case your device is lost or stolen, Lock Watch feature of eScan captures a photo of the user using the front camera after more than two failed unlock attempts.

Share App

This feature allows you to share eScan Mobile Security App with your family and friends using Bluetooth or e-mail.

eScan Widget

The new eScan Widget feature allows quick access to scan, update and call logs as well as shows Anti-Theft Status and allows you to optimize the device.

User-Friendly GUI

eScan Mobile Security for Android has a trendy Graphical User Interface that is designed to suit the needs of both novice and expert users. It has a sleek intuitive design that is simple and easy-to-use. eScan Mobile Security requires very less memory to operate, and hence does not affect the performance of your mobile device.
