

## Banking online? TOP 6 MALWARE you should be BEWARE of

Last updated on: March 30, 2012

---

**These can filch your passwords, deplete your bank accounts and even infiltrate highly secure bank web sites.**

**F**inancial malware have grown leaps and bounds not only in their behavior pattern but also in the way they are distributed (Citadel). However, their overall ingenuity lies in the way they are presented to lure users.

It can be anything from Malicious PDF to links shared on Social Networking sites to phishing schemes. Here are our top six financial malware online users need to aware of.
