

## eScan bags AV -Test Certification for Internet Security Suite, Version 14

05 April, 2016

*eScan, one of the leading Anti-Virus and Content Security Solution providers, bagged the AV-Test certification for their latest home user product, eScan Internet Security Suite, Version 14 for the tests conducted during January and February 2016.*

The results showed that eScan Internet Security Suite successfully blocked 98% of malicious malware and Trojans infections in the test conducted by AV-TEST. The average detection rate among all the solutions tested was 94%. eScan range of security solutions has been outstanding due to the rapid and continuous improvements in the level of protection offered by the product. eScan Internet Security Suite has surpassed all the norms and standards in order to receive the award.

IT users can try the enhanced protection provided by the range of eScan security solutions from here: <http://bit.ly/1pKieq5>

**On receiving this award, Mr Govind Rammurthy, MD and CEO, eScan said, "Winning the AV-Test certification consecutively is a great honour. Congratulations to the entire team of eScan for constantly putting in tremendous efforts to ensure that our products meet the highest security standards."**
