Mumbai: eScan, one of the leading Anti-Virus and Content Security Solution providers, has been successfully securing the end-points of Bajaj Electricals Limited (BEL), since last 7 years. BEL is the leading electrical equipment manufacturing company that has diversified interests in lighting, luminaries, appliances, fans, and engineering projects. The area of concern for Bajaj Electricals was manageability of its endpoints from central location. After implementing eScan Corporate Edition, BEL has been able to achieve minimum outbreaks and save 90% of the time of their employees.

An expert in consumer electrical equipments, BEL wanted a solution for their end-points which could be managed from central location, as several data leaks were found due to weaker system structure that led to latency in manageability and support. They were even looking for central location utility for updating functional aspects.

eScan securing IT Infrastructure of Bajaj Electricals since last 7 years

eScan Corporate Edition features eScan Management Console comes with a Secure Web Interface which facilitates dynamic security management of the server and endpoints in the network. This central management interface facilitates managing, updating, supporting and configuring multiple connected end-points. It allowed Bajaj Electricals to connect approximately 600 machines and provide uninterrupted service. After implementation, employees saved 90% of their time which helped in enhancing the overall productivity.

Mr. Govind Rammurthy, MD and CEO at eScan said, "At eScan, we understand that IT security has become vital and integral part of every business today. The evolving security threats lead to major losses to the affected business and most of the times the loss is irreplaceable. At eScan, our prime motto is not just to ensure business continuity, but to also enhance employee productivity by reducing the time they invest in solving the IT security issues. eScan Corporate Edition is tailor-made to ensure complete security of the IT infrastructure against the increasing number of vulnerabilities, and efficiently secure as well as help manage the protection of the server and endpoints. Bajaj Electricals' security issue was alarming and had to be addressed on priority to secure the data and the network. We are happy that we could help them resolve their issue effectively in a short span of time and continue to ensure them secured computing environment since 7 years."

Mr. G. Sowmiyanarayanan, GM IT - Infrastructure at Bajaj Electricals Limited said "The benefit that we gained from eScan was the balanced solution in terms of security and cost. After deploying eScan security solution, 90% of the employee time has been saved and there is improvement in employee productivity. The dedicated engineers from eScan did a good job and provided us a smooth service. The solution is better than what we believed it to be."
